

Number		
Number and Place Value	Addition and Subtraction	Multiplication and Division
count in multiples of 6, 7, 9, 25 and 1000	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where	recall multiplication and division facts for multiplication tables up to 12×12
find 1000 more or less than a given number	estimate and use inverse operations to check answers to a calculation	use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers
count backwards through zero to include negative numbers	solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	recognise and use factor pairs and commutativity in mental calculations
recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)		multiply two-digit and three-digit numbers by a one-digit number using formal written layout
order and compare numbers beyond 1000		solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m
identify, represent and estimate numbers using different representations		
round any number to the nearest 10, 100 or 1000		
solve number and practical problems that involve all of the above and with increasingly large positive numbers		
read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value		

		Geon
Fractions, Decimals & Percentages	Measurement	Properties of Shapes
recognise and show, using diagrams, families of common equivalent fractions	Convert between different units of measure [for example, kilometre to metre; hour to minute]	compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes
count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	identify acute and obtuse angles and compare and order angles up to two right angles by size
solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole	find the area of rectilinear shapes by counting squares	identify lines of symmetry in 2-D shapes presented in different orientations
add and subtract fractions with the same denominator	estimate, compare and calculate different measures, including money in pounds and pence	complete a simple symmetric figure with respect to a specific line of symmetry
recognise and write decimal equivalents of any number of tenths or hundredths	read, write and convert time between analogue and digital 12- and 24-hour clocks	
recognise and write decimal equivalents to $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$	solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days	
find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		
round decimals with one decimal place to the nearest whole number		
compare numbers with the same number of decimal places up to two decimal places		
solve simple measure and money problems involving fractions and decimals to two		

ometry	Statistics	Ratio & Proportion
Position & Direction		
describe positions on a 2-D grid as coordinates in the first quadrant	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time	
describe movements between positions as translations of a given unit to the left/right and up/down	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs	
plot specified points and draw sides to complete a given polygon
